

PROVA ORALE

1.

- a) Disfagia
- b) Sindrome da allettamento
- c) A cosa serve Outlook?
- d) Quali permessi spettano al dipendente pubblico?
- e) Sufficient and regular physical activity is one of the most widely recommended health promotion strategies for managing chronic illnesses and is known to have various health benefits

2.

- a) Posture ed i loro scopi
- b) Nutrizione artificiale
- c) A cosa serve il programma Excel?
- d) Permessi ex l.104/92: cosa sono, a chi spettano e in che misura?
- e) Stroke is a serious condition associated with a high mortality rate and severe disability . Social functions, such as self-management and communication, are generally reduced in stroke patients, and many reports showed results of poor quality of life (QOL)

3.

- a) Principi generali della terapia farmacologica
- b) Disidratazione e malnutrizione
- c) Cos'è una PEC?
- d) Che cos'è una turnazione? Come si svolge il lavoro a turni? Indennità di turno? Comporta maggiorazioni retributive? In che misura?
- e) Dysphagia is one of the most common complications, which may occur after a stroke, and it occurs to approximately 37-78% of patients with a stroke. This may lead to a degraded quality of life, as well as cause malnutrition, dehydration, and severe aspiration pneumonia

4.

- a) LDP
- b) Contenzioni
- c) Come viene eliminato un file?
- d) Mi parli del Decreto Legislativo 81 del 2008
- e) Pain is the unpleasant sensory consequence of neuronal activity in specific nociceptive pathways. Infection, nerve injury, diabetes and so on influencing peripheral nerves occasionally results in the development of chronic pain, clinically important 'neuropathic pain'

5.

- a) Infezioni
- b) Demenze
- c) I file che si trovano nel cestino, possono essere recuperati?
- d) Cosa sono le ferie? Come ne può usufruire il dipendente?

- e) Diabetic polyneuropathy (DPN) in patients with diabetes mellitus is a heterogeneous disease that involves various parts of the nervous system thus producing a variety of clinical symptoms. Some of the most common types of neuropathies are distal symmetric sensorimotor neuropathies and autonomic neuropathies

6.

- a) Diabete
- b) Cure palliative
- c) A cosa fa riferimento il termine "login"?
- d) Cos'è un IPAB? Dica il candidato quali sono gli organi di un Ipab e le relative funzioni
- e) Muscle strength is a strong predictor of severe mobility limitation, slow gait speed, increased fall risk, risk of hospitalization, and high mortality rate. For example, older adults with low muscle strength have a 2.6-fold greater risk of severe mobility limitation

7.

- a) Le cadute nell'anziano
- b) Scale di valutazione
- c) Qual è la funzione dello scanner?
- d) Tutela delle lavoratrici madri
- e) Gait disturbance after suffering a stroke may significantly affect one's daily activities. Thus, assessment of a patient's gait ability immediately after a stroke and establishment of a treatment plan are most important before beginning rehabilitation
